

DESIGN FOR SAFETY (DFS) CONSULTANCY SERVICES

- CUSTOMISED DFS (SINGAPORE), SBD-OSHCIM (MALAYSIA)

Mandatory for Developers in Singapore to implement DfS for contract sum \$10 million or more, beginning August 1st, 2016. The Developer may delegate his/ her duties specific under the regulations to a consultancy firm that is competent to perform the duties, thus allowing him/ her to focus on allocating adequate time and resources for project design and construction works.

- Coaching:

To share DfS/SbD insights with top management and how DfS/SbD benefits company businesses; to coach top management/ PM on appropriate approaches towards implementing DfS/SbD in their company/ project

To perform documentation check and physical site inspection; to interview key personnel and verify

- Audit:

To perform documentation check and physical site inspection; to interview key personnel and verify DfS/ SbD implementation status and compliance of regulations

- Training:

To share DfS/SbD booklet and equip participants with basic competency level to identify foreseeable design risks during the DfS/SbD Review workshop session ([Introduction, For Developers/Designers, For Builders/Contractors](#)) that we offer!

PROJECT MANAGEMENT CONSULTANCY

To represent Developer in managing project by coordinating with project consultant (*Architect, Civil & Structural Engineer, M&E Engineer, Landscaping Architect, ID, specialist designer*) and construction team to complete the project within specific period of time and allocated budget, as well as to promote good working environment towards safety & health.

TEMPORARY STRUCTURAL WORK DESIGN AND INSPECTION

To design works with calculation, endorsement and certificate of supervision (COS) for temporary structural works. We also provide structural assessment to conservative structures before commencing A&A works.
