

IMS: ISO 9001 (QUALITY MANAGEMENT SYSTEM); ISO 14001 (ENVIRONMENTAL MANAGEMENT SYSTEM); ISO 45001 (OCCUPATIONAL HEALTH & SAFETY MANAGEMENT SYSTEM)

We provide in-house training and consultancy works for integrated management system (IMS). We align company's operations towards IMS requirements and assist company seeking for ISO certification. We believe a practical IMS is critical to promoting productivity and eliminating massive paper works.

RISK MANAGEMENT (RM) TRAINING

To promote identifying "risk at source" – we train all stakeholders to have competent knowledge and skills in performing risk assessment in a new project or A&A works. The level of RM training will depend on stakeholder's knowledge and their works' experience.

INCIDENT & ACCIDENT INVESTIGATION

To conduct site incident & accident investigation upon stakeholder's request.

To prepare the incident & accident report based on factual information (documentation check, physical site inspection and interview of key personnel involved in incident & accident). If required, we are prepared to stand in as an expert for the case.
